Standardized Child Passenger Safety Training Program

The Start— March 1999

Certification Update

As of February 1999, there are 1210 certified technicians and 248 certified technician instructors.

CPS Review Board:

The National Highway Traffic Safety Administration will initiate the establishment of a Child Passenger Safety Review Board. Members will include representatives of national organizations that have played a role in the establishment and/or implementation of the Standardized Child Passenger Safety Training Program and AAA Certification Program, advocates, child seat and vehicle manufacturers, and injury prevention and health organizations. The board will be comprised of approximately 15 members, with at least 4 certified as either technicians or technician instructors in the NHTSA Standardized CPS Training Program.

The purpose of the board is to provide overall policy and program direction and maintain the national standardized curriculum, test, and standards for implementation. It is anticipated that the first meeting of this Board will be in March 1999.

Several committees were formed, including By-laws, Certification, Curriculum, Re-certification, and Communications. A task force to monitor training quality.

The Certification Committee, headed by Lorrie Walker, plans to modify, create, or improve the forms and the process used in certification.

The Curriculum Committee, headed by Nancy Lang, met in April to begin revising and updating the curriculum. It is slated to be completed during the summer.

The Re-certification Committee, under Bill Wen, has developed an interim process and will have a formal process in place by January 2000.

The Communications Committee, chaired by Carole Guzzetta, has begun a process of improving communications among the various stakeholders.

To communicate with the board, contact the coordinator, Carole Guzzetta of NSC, at 202-296-6263 or (e-mail) guzze@c@nsc.org.

Members of the board

Chair: Steve Anderson, USAA

Mariela Alarcon, National Council of La Raza

Barbara Foley, Emergency Nurses Assn.

Carole S. Guzzetta, National Safety Co.

William Hall, University of North Carolina Highway Safety Research Ctr.
